The Villars Framework for a Sustainable Global Trade

In her article, Linnéa Nordlander explores the significance of the Villars Framework for a Sustainable Global Trade. The article discusses how the framework can be used to address global trade issues such as sustainability, environmental protection, and human rights. The article also discusses the practical implications of the framework for businesses and governments.

New Article: The Actors of Green Ship

In her article, Justine Bendel discusses the actors involved in the development of green ships. The article explores how different stakeholders such as shipowners, designers, and policymakers are working together to create sustainable ships. The article also discusses the challenges and opportunities associated with developing green ships and how the actors are addressing these challenges.

The paper examines the legacy of CILG, CLIMA is committed to pioneering Law and Governance (CLIMA). Building upon the legacy of CILG, CLIMA is committed to pioneering research and teaching in international law, with a climate or sustainability focus.
