II Interdisciplinary Seminar on
Climate, Energy and Sustainability

13th February 2020, Copenhagen Center for Disaster Research

The Centre for International Law, Conflict and Crisis (CILCC), Faculty of Law, University of Copenhagen, the Copenhagen Centre for Disaster Research (COPE) and the student associations Energy Crossroads Denmark and Casus Clima are happy to announce the Second Edition of the Interdisciplinary Seminar on Climate, Energy and Sustainability, which will take place on the 13th of February of 2020 at COPE, University of Copenhagen (CSS Campus). This seminar follows the success of the First Edition, which took place last June at the Faculty of Law of the University of Copenhagen.

The seminar offers an opportunity to students and junior researchers to present their work (master thesis and other research projects) on climate, energy and sustainability related topics, and receive feedback by peers and participants. In addition, students looking for inspiration for their theses or looking to connect with a broad network of students and professionals with similar interests and expertise are welcome to attend.

The event is open to students from all disciplines and universities in Denmark.

After the workshop, lunch will be served, and there will be an opportunity for some informal networking among the participants.

Time: Thursday, 13th February 2020 from 09:30 to 12:00

Venue: Copenhagen Centre for Disaster Research, University of Copenhagen (CSS Campus)
Øster Farimagsgade 5. Building 22 (the Chapel). DK-1353 Copenhagen

Attendance of the workshop is free. For registration, please click here.

If you wish to present your work or have further questions, please contact:
