

# Roundtable

## *Lessons for Offshore Wind Development: Best Practices from Denmark and beyond*

***Tuesday, 3 May 2022 16:00 – 17:45***

***Center for International Law and Governance (CILG)***

*The Faculty of Law*

*Meeting room: 8A-0-57 (Flex Room)*

*Njalsgade 76, DK-2300 Copenhagen S*

Renewable energy sources are a central component for the decarbonisation of the energy sector, thereby providing an essential contribution to the mitigation of climate change. Offshore wind, both with fixed foundations and floating, is deemed to be a central technology, and it is expected to expand substantially in the next decades. Accordingly, new technologies and practices in offshore wind are developing rapidly to cater for the need to accelerate such technology globally.

As a first-mover in offshore wind energy, Denmark, and its renewables industry, have proven themselves to be a global leader in offshore wind development. Against this backdrop, this roundtable will bring together experts from the renewables industry, who will share challenges and best practices in developing offshore wind in Denmark and beyond.

# PROGRAMME

Time	Programme
15:45 – 16:00	<b>Arrival of participants</b> Coffee, tea and croissants
16:00 – 16:05	<b>Opening and welcome</b> Beatriz Martinez Romera, <i>Associate Professor, Faculty of Law, University of Copenhagen</i>
16.05 – 16.15	<b>Setting the scene: offshore wind and climate action</b> Daniel C. Esty, <i>Hillhouse Professor at Yale University, Yale Environmental and Law Schools</i>
16:15 – 17:40	<b>Chair:</b> Federica Catonini, <i>Student at CILG, Faculty of Law, University of Copenhagen</i>  <b><i>How to speed up global deployment of offshore wind power?</i></b> Emil Damgaard Grann, <i>Head of Global Policy Engagement, Ørsted</i>  <b><i>Market development and regulatory challenges in offshore wind</i></b> Lise Lotte Lyck, <i>Market Development Director, Copenhagen Offshore Partners</i>  <b><i>Drafting agreements in offshore wind</i></b> Mathias Rose Svendsen, <i>Attorney-at-law, Accura</i>  <b><i>Developing an energy island in the North Sea to accelerate the green transition – law and policy from a Danish perspective</i></b> Dr. Amalie Gioedesen Thystrup, <i>Head of Section, Danish Energy Agency</i>  <b><i>Commercialising floating wind and the operational challenges ahead</i></b> Dr. Ilmas Bayati, <i>Head of Floating Wind Excellence, PEAK Wind</i>  <b>Q&amp;A</b>
17:40-17.45	<b>Closing remarks</b> Beatriz Martinez Romera, <i>Associate Professor, Faculty of Law, University of Copenhagen</i> Daniel C. Esty, <i>Hillhouse Professor at Yale University, Yale Environmental and Law Schools</i>
